

CrossFyre'16

Sixth International Workshop on **C**ryptography, **R**obustness,
and Provably **S**ecure **S**chemes for **F**emale **Y**oung **R**esearchers

This workshop aims to bring female researchers in the field of Cryptography and Information Security together to promote their research topics and careers in science and engineering. Though CrossFyre primarily aims to bring women together to discuss their career opportunities, network, and exchange experiences, male researchers are also encouraged to attend.
